EDUCATION

Stanford University BS, Computer Science [Graphics] 2020 - 2024

EXPERIENCE

Alliance Foundation Founding engineer FEBRUARY 2025 - APRIL 2026

Designed and built platform for facilitating collective action and online social/political coordination. Launched web and mobile apps to beta cohort of users, handled analytics, server infrastructure, and product direction.

Wanderlog Fullstack software developer JUNE 2024 - JANUARY 2025

Developed web and mobile applications features for Wanderlog trip planner. Created onboarding flows to improve conversion, extended and optimized map display and route planning features.

Apple Software engineering intern JUNE 2023 - SEPTEMBER 2023

Display and color team. Did research in perception and color science for accurate screen color display, HDR and environmental display adaptation. Wrote algorithms for perceptual color space transformation and display evaluation based on human perception.

Meta Reality Labs Software engineering intern JUNE 2022 - SEPTEMBER 2022

Image quality team, computational photography for XR products. Developed C++ image signal processing pipelines and GLSL shaders. Performance analysis / optimization of GPU programs. Implemented raw image demosaicing and dehazing algorithms as well as creative photo editing effects.

Stanford Virtual Human Interaction Lab VR developer AUGUST 2021 - SEPTEMBER 2022

Led Unity development of VR experience for Oculus Quest showcasing lab research via interactive demos. Helped facilitate Stanford class taught in VR by creating 3D environments for holding virtual discussion sections.

Temple Allen Industries Software engineering intern MARCH 2021 - JUNE 2021

Designed and built production web app for remote control and monitoring of robotic systems. Worked on computer vision to control motion planning. Created web visualizer and data analytics to show real time abrasion patterns.

Playground Global Software engineering intern JUNE 2019 - AUGUST 2019

Set up and programmed robotic arm to autonomously cook omelets. Designed and trained computer vision system to control the cooking routine. Designed and built iOS app and database for custom omelet orders.

OTHER

Stanford XR SEPTEMBER 2021 - JUNE 2024

VP of Education, VP of Projects. Taught course CS11SI, teaching Unity game development, 3D modeling, VR design techniques. Organized and taught workshop series on AR/VR development, organized projects cohort of XR developers. Developing curriculum for new spatial computing design course involving Quest & Vision Pro headsets.

3D Art & Game Development

Personal game development: https://spaaace.itch.io/. 3D art: https://caseymanning.github.io/portfolio

SKILLS

Unity C++ Java JavaScript Python Blender Houdini GLSL Swift C# React Computer Vision
